DESCRIPTION

The Oehlbach DA Converter of the extra class converts digital to analog audio signals. High resolution coded signals are recorded via a coaxial or optical input. A switch is used to select the desired input and the subsequent output is a 2-channel RCA output. Inside the device, a high-quality Cirrus Logic chip takes over the loss-free conversion from digital to analog. The handy DA Converter is suitable for audio sources in PCM format and supports audio signals up to 192kHz/24Bit. The USB port or the power supply plug is used for power supply. (Dolby and DTS formats are not decoded).
