DESCRIPTION

This high-speed HDMI® cable delivers unlimited home-cinema fun. The additional data channel (Ethernet channel) allows Internet-enabled AV components, e.g. Blu-ray players and AV receivers, to be connected without the need for additional network cables. The high-quality inner conductor, which is manufactured from OFC copper and features triple shielding as well as 24-carat gold-plated plug contacts, guarantees the transmission of completely stable and interference-free signals – particularly where critical digital signals are concerned.
