PHASE DETECTOR

Phaser

€97.00 RRP incl. VAT

Product number **D1C17017**

EAN **4003635170175**

HIGHLIGHTS

- Maximisation of the performance of the connected devices
- Compact design

DESCRIPTION

Unit for an easy and accurate detection of in-phase polarity of all homecinema-, audio- and video devices. Connecting all devices in-phase to a high-performance powersocket (like for example the Oehlbach Powersockets or Powerstation) avoids ground-loop circuits and preserves perfect acoustic imaging and interference-free visual display. The tester is easy to operate and is run by reliable, solid technology. The cabinet comes in a solid, high-grade aluminium finish aluminium case. The Phaser is powered by a standard 9 V batterie (included in delivery). (Restricted function on components with inductive mains switch.)

TECHNICAL DATA

Weight	0.431 kg	**Quality level**	Performance
Length	260 mm	**Colour**	Silver
Width	165 mm	**Product Category**	Electronics
Height	80 mm	**Battery types**	9V
Housing material	Ultra thin single conductors
