

# Phaser

OEHLBACH Phaser - Phasendetektor. Premium OEHLBACH quality for precise signal transmission in Hi-Fi and home cinema systems.

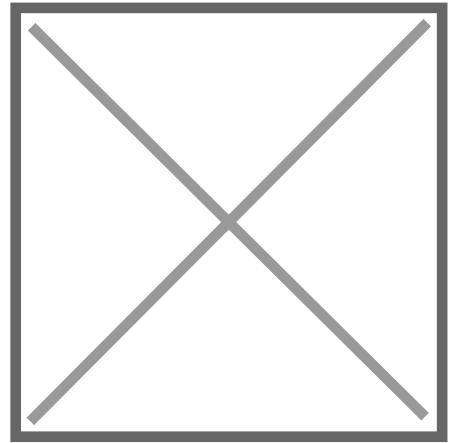

**Product number** D1C17017

**Weight** 0.431kg

**Length** 260mm

**Width** 165mm

**Height** 80mm

## Product description

Unit for an easy and accurate detection of in-phase polarity of all homecinema-, audio- and video devices. Connecting all devices in-phase to a high-performance powersocket (like for example the Oehlbach Powersockets or Powerstation) avoids ground-loop circuits and preserves perfect acoustic imaging and interference-free visual display. The tester is easy to operate and is run by reliable, solid technology. The cabinet comes in a solid, high-grade aluminium finish aluminium case. The Phaser is powered by a standard 9 V batterie (included in delivery). (Restricted function on components with inductive mains switch.)

## Product properties

**Features** Maximisation of the performance of the connected devices, Compact design

**Housing material** Ultra thin single conductors

**Quality level** Performance

**Colour** Silver

**Product Category** Electronics

**Battery types** 9V
