Product description

With the practical antenna distributor from Oehlbach, two TV sets or receivers can be connected to a single antenna socket. Due to the high shielding factor of over 110 dB and two high-quality resistors of 42 ohms each, a high-quality and loss-free doubling of the signal is guaranteed. Compact dimensions also ensure that the module can be easily accommodated. The distributor in a shielded metal housing is suitable for DVB-C as well as for terrestrial television according to the current DVB-T2 standard. This 2-way antenna distributor is used to connect two TV sets or receivers to one antenna socket.
