### Product description

High-quality optical fiber cable for an optical-digital audio connection between the individual components of a home cinema system. The patented design of the optical digital cable with 217 individual optical fibers made of special polymer optical fibers achieves the highest luminosity and enables a data transmission rate of up to 125 Mbps (megabits/second). The standard for the transmission of multi-channel audio formats via an optical Toslink interface only stipulates a transmission rate of 12.8 Mbps! Ready-made with the "XXL Series 80 CO" Toslink plug matched to this cable.
