## Product description

High-quality and particularly flexible stereo speaker cable for connecting amplifiers or power amplifiers to speaker cabinets. The speaker cable is suitable for amplifier power of up to approx. 300 watts per amplifier channel. The cable consists of three stranded strands of OFC copper (oxygen-free copper) and three stranded strands of SPOFC copper (silver-plated oxygen-free copper). Due to the proportion of silver-plated conductors, this special construction results in significantly improved transmission, especially in the high/mid-range! The outer jacket of this Oehlbach cable consists of a hard-wearing and flexible plastic mixture.
