DESCRIPTION

High-end subwoofer cable of the extra class! Due to a particularly large cross-section of the inner conductor and the coaxial design, this state of the art is specially tuned for the transmission of low frequencies. The inner conductor made of high-purity, long-crystalline HPOCC copper guarantees an absolutely precise and powerful bass reproduction. The 2-fold shielding of silver-plated copper braiding also reliably eliminates any signal interference that may occur. Pre-assembled with the innovative RCA plugs XXL Silicon Evolution, the cable always offers the optimum bass performance.
