DESCRIPTION

Digital high-end antenna cable for the transmission of high-resolution audio and image data. External interference stands no chance thanks to the use of a very compact sheath current filter. This five-star antenna cable's inner conductor is manufactured from highly pure, oxygen-free HPOCC® copper, its fivefold shielding means that its signal transmission is almost perfect and loss-free. The shielded full-metal plug helps make the transmission of highly sensitive HDTV signals extremely stable – particularly at the critical material transitions.
