DESCRIPTION

For the connection of digital antenna television DVB-T2 or cable television this Oehlbach Transmission Shift cable with 90 degree angled female and male end connects devices such as TV or receiver with the antenna or cable connection box. There is often little space behind devices for a straight antenna plug or the antenna cable is to be routed away at a 90-degree angle for optical reasons. Oehlbach has designed the right-angled Transmission Shift antenna connector for such cases. The two 90° antenna connector sleeves are already fitted to the Transmission Shift antenna cable. Transmission Shift brings with it an impedance of 75 ohms, a maximum one hundred percent contact area - complete with 24 carat gold-plated contacts. Thanks to high corrosion resistance, optimal transmission of image and sound signals is guaranteed for many years.
