

Transmission Shift | Female angled (1 piece)

OEHLBACH Transmission Shift - High-quality coaxial antenna cable with high shielding for interference-free TV reception. For DVB-T2, cable TV and satellite.

Product number D1C62008

Weight 0.075kg

Product description

These ready-made IEC antenna plugs from the Oehlbach Transmission Shift series ensure optimum transmission of picture or sound signals and connection to the TV or receiver with the antenna or cable connection socket for digital antenna television DVB-T2, cable television and classic FM radio. Together with the enclosed antenna connector sleeve, it is simply mounted on the Oehlbach Transmission Max antenna cables as a ready-made antenna socket or connector. For this purpose, these IEC antenna sockets and plugs have an impedance of 75 ohms, a maximum, one hundred percent contact surface - completely gold-plated with 24 carat. Thanks to their high corrosion resistance, they guarantee excellent transmission of video and audio signals for many years. The plugs and sockets are available in both straight and 90° angle versions, in a double pack (male/female) as well as individually.
