DESCRIPTION

The 3-star Oehlbach Digicon C/O converts a digital electrical signal into an optical signal. For this purpose, a coaxial and an optical connection are integrated into the solid metal housing of the Digicon C/O, which is 24 carat gold-plated for maximum transmission and contact reliability. The Digicon C/O converts compressed and uncompressed audio signals up to a sampling depth of 24 bits. Thanks to strictly selected electronic components, the conversion process is absolutely loss-free and guarantees an above-average quality of the converted output signal.
