Product description

Excellently made stereo loudspeaker cable wound on to a mini coil. This loudspeaker cable is suitable for amplifier performances of up to around 250 watts of power per amplifier channel. The use of oxygen-free copper (OFC) as the conducting material ensures that an extremely clear and true-to-life sound can be achieved with this loudspeaker cable. The cable has also been made from very many ultrathin stranded copper wires – each individual wire possesses a cross-section of around 0.125 mm. This complex design means that the cable is particularly conductive and flexible throughout.
