DESCRIPTION

Excellently coordinated stereo loudspeaker cable for connecting AV receivers or amplifiers and loudspeaker boxes. The cable is preassembled with Oehlbach Solution cable-shoe connectors to allow convenient connections and guarantee a stable quality of transmission. This loudspeaker cable is suitable for amplifier performances of up to around 600 watts of power per amplifier channel. The cable is manufactured from three stranded strings of oxygen-free copper (OFC) and three stranded strings of silver-plated oxygen-free copper (SPOFC). The proportion of silver-plated conductors means that this special design considerably improves transmission properties, particularly in the treble/mid-tone range! This Oehlbach cable's outer sheath is made from a tough, transparent and highly flexible mix of plastics for very supple and flexible laying.
