75 OHM TERMINATION FOR DIGITAL RCA CONNECTIONS

COVERCON 75

MSRP (19%): 17.49

This 75 OHM Cover Connector has been specially developed for digital outputs that are not being used on CD players and high-quality DVD and Blu-ray players. As a precisely defined terminating resistance for open digital cinch outputs that cannot be deactivated, it counters any reflections occurring at these points and thus effectively prevents sound degradation caused by interference to the main signal. Sound transmission from digital sources becomes audibly more natural and considerably more precise.
