RESONANCE DAMPER

XL AIR ABSORB

4 PIECES

Perfectly made vibration damper for acoustically insulating high-quality hi-fi loudspeaker boxes and home-cinema systems. They reliably prevent the transmission of undesirable resonance frequencies from the loudspeaker case to floor. These high-quality Oehlbach resonance dampers may, of course, also be used for other components within hi-fi and home-cinema systems.

Features	Max. load bearing capacity 25 kg, German Technology
Article width	41 mm
Article height	30 mm
Article depth	41 mm
