

Series 2 X | 1.25 m

Model	D1C13213
Weight	0.408kg
Width	40mm
Length	320mm
Depth	220mm

Technical Specifications

Technical specifications and performance details for the Series 2 X cable. The cable is designed for high-fidelity audio transmission, featuring a 24kt gold-plated shield and a HiFi-grade conductor. It is compatible with various audio equipment, including mixers, amplifiers, and recording studios. The cable's construction ensures optimal signal integrity and low noise floor, making it a preferred choice for professional audio applications. The connectors are robust and provide a secure connection, ensuring consistent performance over time.

Product Features

- 24kt gold-plated shield for superior shielding and signal purity.
- HiFi-grade conductor for exceptional audio fidelity.
- Compatible with various audio equipment, including mixers, amplifiers, and recording studios.
- Robust construction for long-term durability and reliability.
- Secure connectors for consistent performance.
- State of the Art technology for professional audio applications.
- 24kt gold-plated shield for superior shielding and signal purity.
- HiFi-grade conductor for exceptional audio fidelity.
- Compatible with various audio equipment, including mixers, amplifiers, and recording studios.
- Robust construction for long-term durability and reliability.
- Secure connectors for consistent performance.
- State of the Art technology for professional audio applications.
