

Shock Absorb Plus

OEHLBACH Shock Absorb Plus - Resonance damper for vibration decoupling of Hi-Fi equipment. Reduces microphony and vibrations for pure, uncoloured sound.

OEHLBACH Shock Absorb Plus D1C55044
Weight: 0.15kg
Diameter: 140mm
Height: 100mm
Thread: 30mm

Product Features

The Shock Absorb Plus is designed to reduce microphony and vibrations in Hi-Fi equipment, ensuring a pure and uncoloured sound. It is suitable for use in various audio systems, including turntables, amplifiers, and speakers. The damper's unique design allows it to absorb and dissipate energy, preventing unwanted vibrations from affecting the sound quality. Its compact size and easy installation make it a popular choice among audiophiles and professionals alike.
