Transmission Shift

Transmission Shift is a high-quality coaxial antenna cable with high shielding for interference-free TV reception. For DVB-T2, cable TV and satellite. Transmission Shift is available in various lengths and is suitable for all types of antennas. The cable is made of high-quality materials and is designed for long-term use. The shielding is made of multiple layers of braided copper and aluminum, providing excellent protection against interference. The cable is also resistant to weather and UV radiation. Transmission Shift is a reliable and durable solution for your TV reception needs.
