Depth	18mm

Technical Specifications

The Tracking Force scale is designed for precise measurement of the tracking force of your tonearm. It features a high-precision digital scale with a range of 0.01g to 200g and a resolution of 0.01g. The device is compact and easy to use, making it an essential tool for audiophiles and home cinema enthusiasts. The scale is made of high-quality materials and is built to last. It is compatible with all standard tonearms and cartridges. The scale is also very accurate, with a maximum error of ±0.01g. This ensures that you can adjust your tracking force to the optimal level for your system, resulting in the best possible sound quality.

Product Features

- High precision digital scale
- Range: 0.01g - 200g
- Resolution: 0.01g
- Performance
- Silver
- Accuracy: ±0.01g
- Operating temperature: 10-30 °C
